

AVK has a standard product warranty of 10 years, but this is assuming the product is installed.

When stored, we use a maximum warranty of 2 years after production date assuming the beneath rules are followed:

- Repair clamps are NOT to be stored in direct sunlight or other UV-light sources [1] due to the harmful effects of UV Light on the rubber.
- Repair clamps are to be stored dry [2] because of hygienic reasons.
- Repair clamps are to be stored free of insects or other animals [3] because of hygienic reasons.

- Repair clamps with tolerance above Ø100 should not be put on its side [4] but have to be stored in upright [5] position.

- Temperature in storage does not go below -10° and does not go above 40° Celsius.

If the above rules concerning storage are not followed, product warranty is lost.
